

A new
era of
windows!

KÖMMERLING 88

Premium centre seal system – AddOn

KÖMMERLING®

INTEGRATED PRIVACY SCREEN AND ADDITIONAL SOUNDPROOFING.

KÖMMERLING 88 is the premium window in a new era of window technology. It offers groundbreaking heat insulation properties, is a trendsetter in design and a pioneer in quality and security. Thanks to its modular concept and innovative upgrade technologies, it also offers impressive options for individualisation.

Modern design with multiple features.

The AddOn aluminium interconnecting frame has a modern design with optional shutter system and sunshade for maximum integrated comfort and convenience. The additional glass pane also improves heat insulation and soundproofing properties.

Perfect harmony.

Aluminium is one of the best window materials around. It is elegant, weatherproof, easy to clean and available in an almost unlimited range of colours. PVC, on the other hand, provides optimum heat insulation and soundproofing, plus high functional reliability. KÖMMERLING 88 AddOn unites both materials of aluminium and PVC perfectly in one single window system.

KÖMMERLING 88 – AddOn

Premium window and door system with a contemporary installation depth of 88 mm.

- Optional privacy and sun protection feature between two glass panes.
- Suitable for PVC windows with aluminium facing shells.
- An additional glass pane improves soundproofing and heat insulation properties.
- Optimum cost effectiveness, eco-friendliness, durability and robustness.
- Practically unlimited choice of aluminium shell and interconnecting frame colours with finishing techniques including Eloxal and powder coating.
